

### Inclement Weather Information:

Safety is one of our top priorities and sometimes the weather makes it impossible to operate safely. During heavy snow/blizzard and ice conditions, we may be forced to suspend collections for the day. In that case, we will make every effort possible to communicate this to our customers via our website ([www.trmdisposal.com](http://www.trmdisposal.com)) or Facebook. The affected customers will receive service the next day or when road conditions permit.

For our private road customers, we can only travel on roads and driveways free of ice and/or snow. We understand that this is not always an easy task, so if the driveway or private road cannot be cleared, please have trash at the curb or sitting at the main road.

We remind everyone to avoid placing containers on top of snow banks. This creates a safety hazard for our service provider by putting the weight above their center of gravity because all trash containers are collected by hand, not by machine. In order to protect the health and safety of our workers, T. R. M. Disposal has instructed service providers not to collect garbage containers placed on top of snow banks.

Placing a container in the street is to be avoided. The container could become a road hazard for other passing vehicles.

Thank you for your compassion and understanding as we work to provide a safe environment for our service providers.
